

The background of the page features a light teal color with various medical icons scattered across it. In the top left corner, there's a white blister pack filled with red and white striped tablets. To its right is a large blue and white syringe with a red liquid inside. In the top right corner, another white blister pack contains blue and white striped tablets. Along the bottom edge, there's a blue and white prescription bottle on the left, and a clipboard with a red border and a blue profile icon on the right. Several white and grey striped tablets are floating in the center and bottom areas.

*introduction*

# WELCOME

---

Dear patients and doctors welcome in SmartDoc user guide we are very happy that you choose our system We strongly believe that SmartDoc will completely your need and will be useful in your daily life as patient or as doctor.

Your SmartDoc team.

# STARTING SYSTEM

To run SmartDoc system first you need the database created and running. To do it, open the SmartDoc System folder, and please run the smartdocdatabase.sql as a query in your database.

After you've done, return to SmartDoc System folder, and open a command line. Write "java -jar Server.jar"

```
Last login: Fri Jun  8 00:30:43 on ttys001  
Boris-MacBook-Pro:Exporting-1 borissidlo$ java -jar Server.jar
```

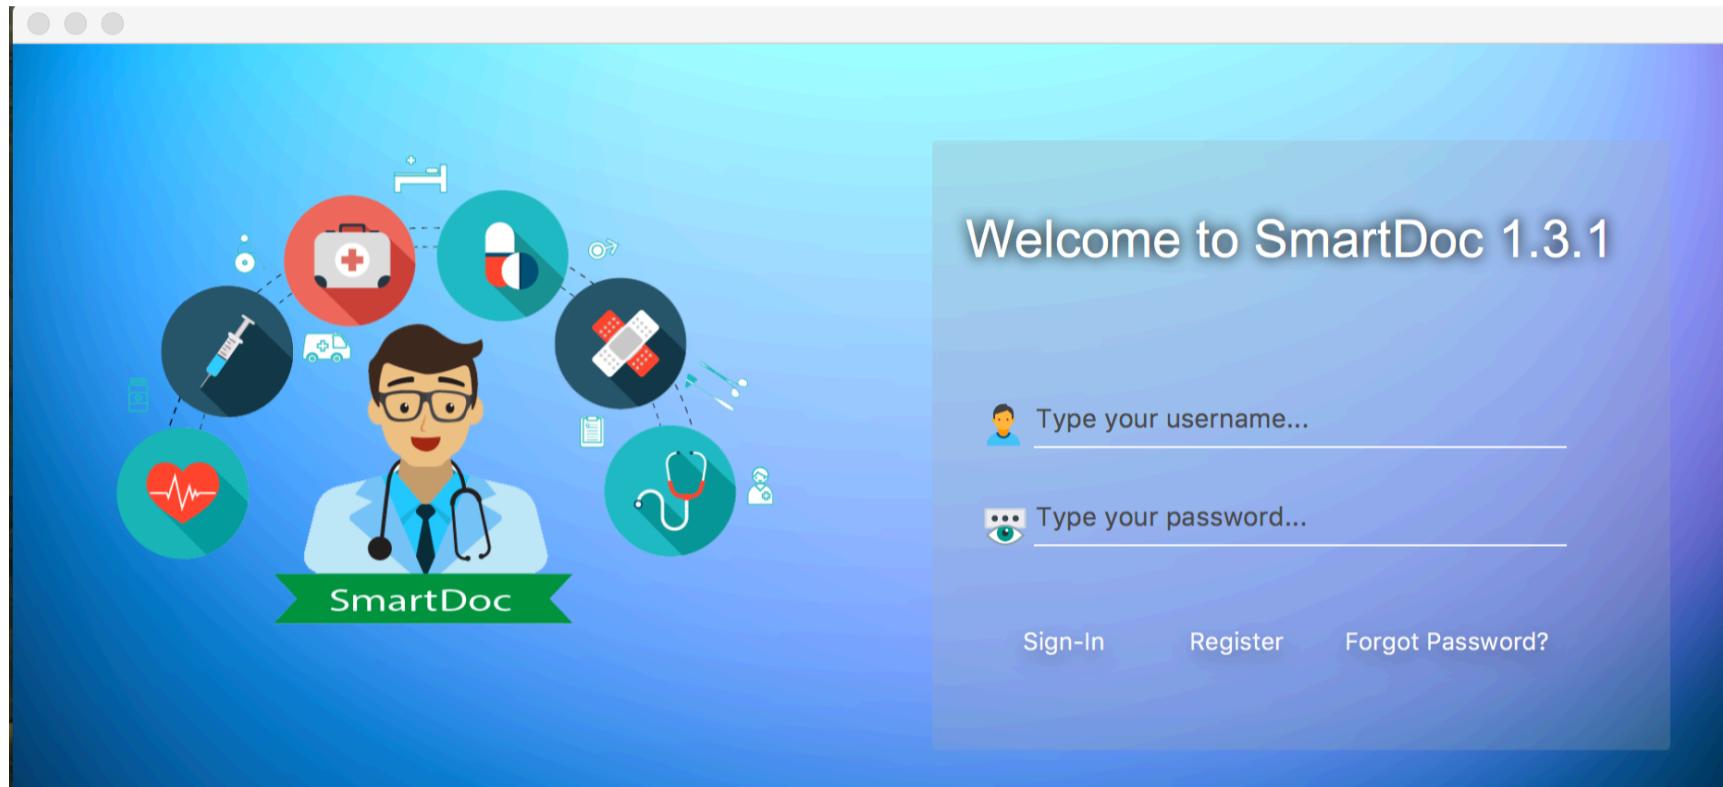

and follow the instructions displayed in the console.

You should see the "Server is running" command, after which yours system is ready to run. You can now open Client.jar and login as an admin. (username: admin, pass: 321

```
Write the dbs username  
postgres  
Write the dbs password  
123  
Write the dbs port  
5432  
Write the dbs ip  
localhost  
Write the dbs databaseName  
smartdocdatabases
```

# GENERAL DOCTOR

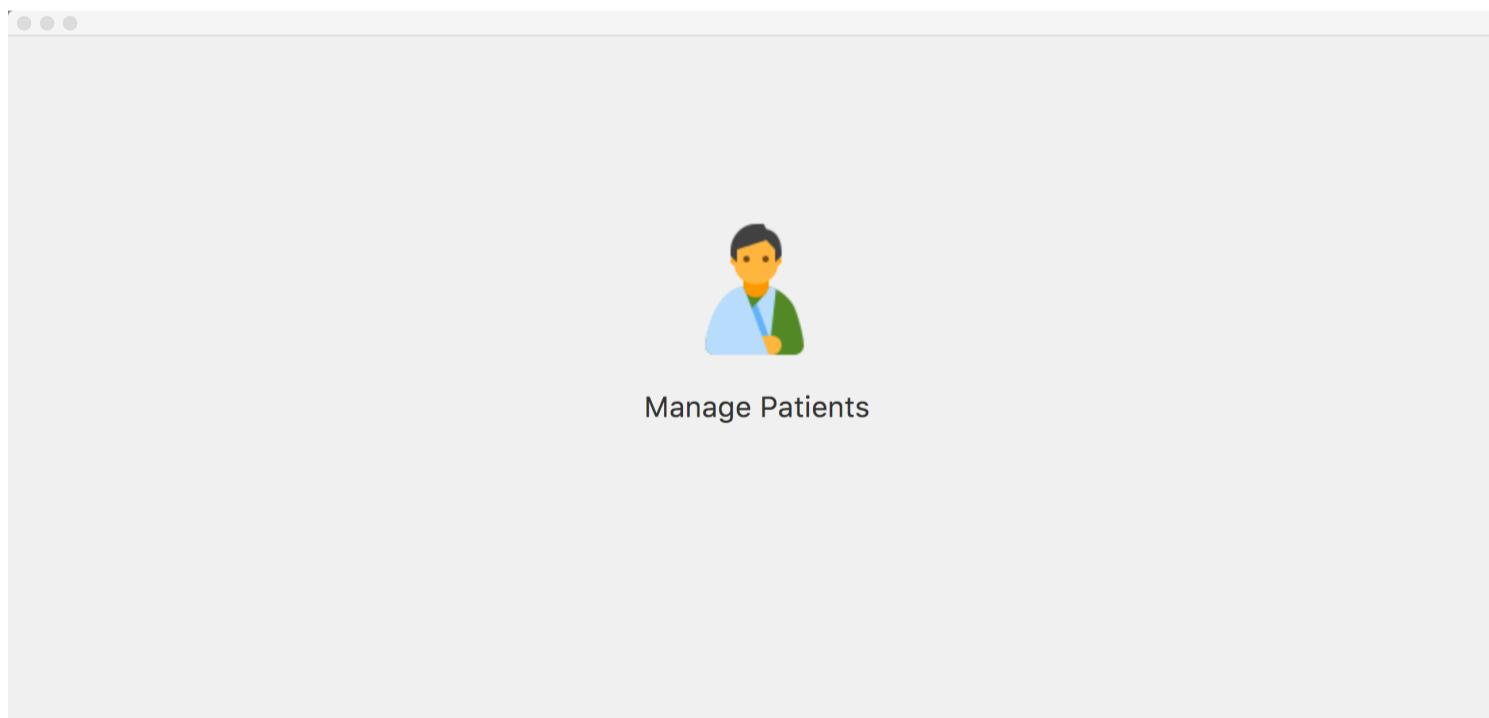

As a doctor your first step is to login in to the system you will received your username and password by admin. It depends if you are a **general** doctor a **specialist**.

*General doctor*

After you login as a general doctor you can manage your patients by click

[Manage Patients](#)

after you have to insert your patients number and click

Continue

## Enter Patient's CPR

180895-3591

Continue   Clear

you will enter to the part of system when you can assign patient to the specialist. It is

The screenshot shows a software window with a sidebar on the left containing patient information: First Name (Boris), Last Name (Sidlo), E-mail (boris@via.dk), Birthday (1995-08-18), Gender (M), Type (P), Phone Number (728155902), and CPR Number (180895-3591). A circular icon of a doctor is also present. The main area is titled "Doctors" and displays a table with one row of data:

First Name	Last Name	Speciality	E-mail	Gender	Date Of Birth	Type	Phone	CPR
Monica	Xavi	Dermatolog...	monica@e...	F	1995-08-18	D	5277477	180895-44...

A large black arrow points from the patient sidebar to the "Assign this Patient to the Doctor" section on the right, which contains a text input field ("Enter doctor's CPR") and an "Apply" button.

it is very simple you just choose specialist and enter specialist's CPR and press

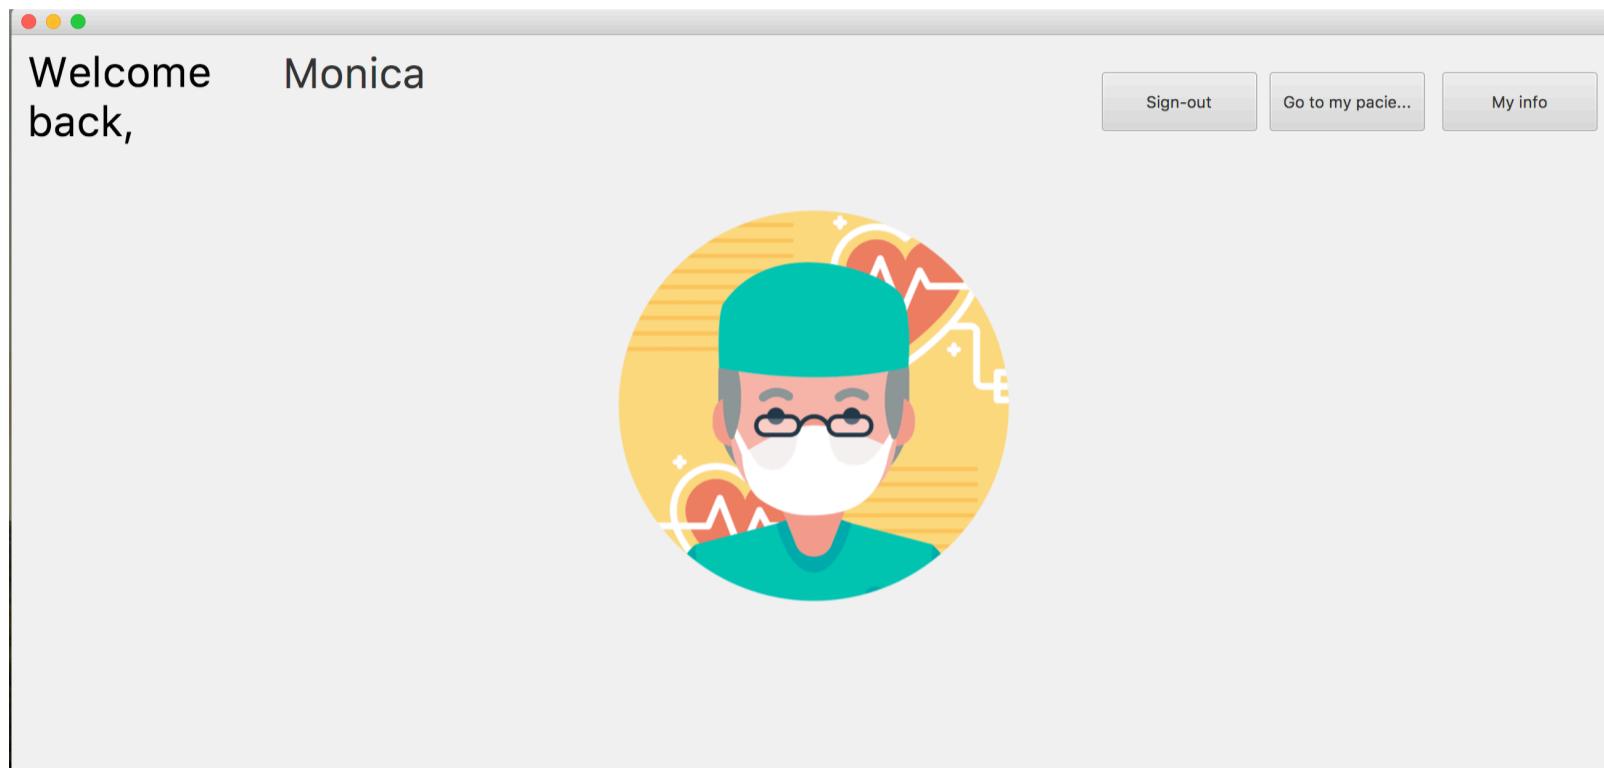

Apply

The screenshot shows a confirmation dialog box with the title "SUCCESS". It contains a message area with the text "The operation was completed without any errors!" and an "OK" button at the bottom. A large black arrow points from the previous screenshot to this dialog box.

you will get message

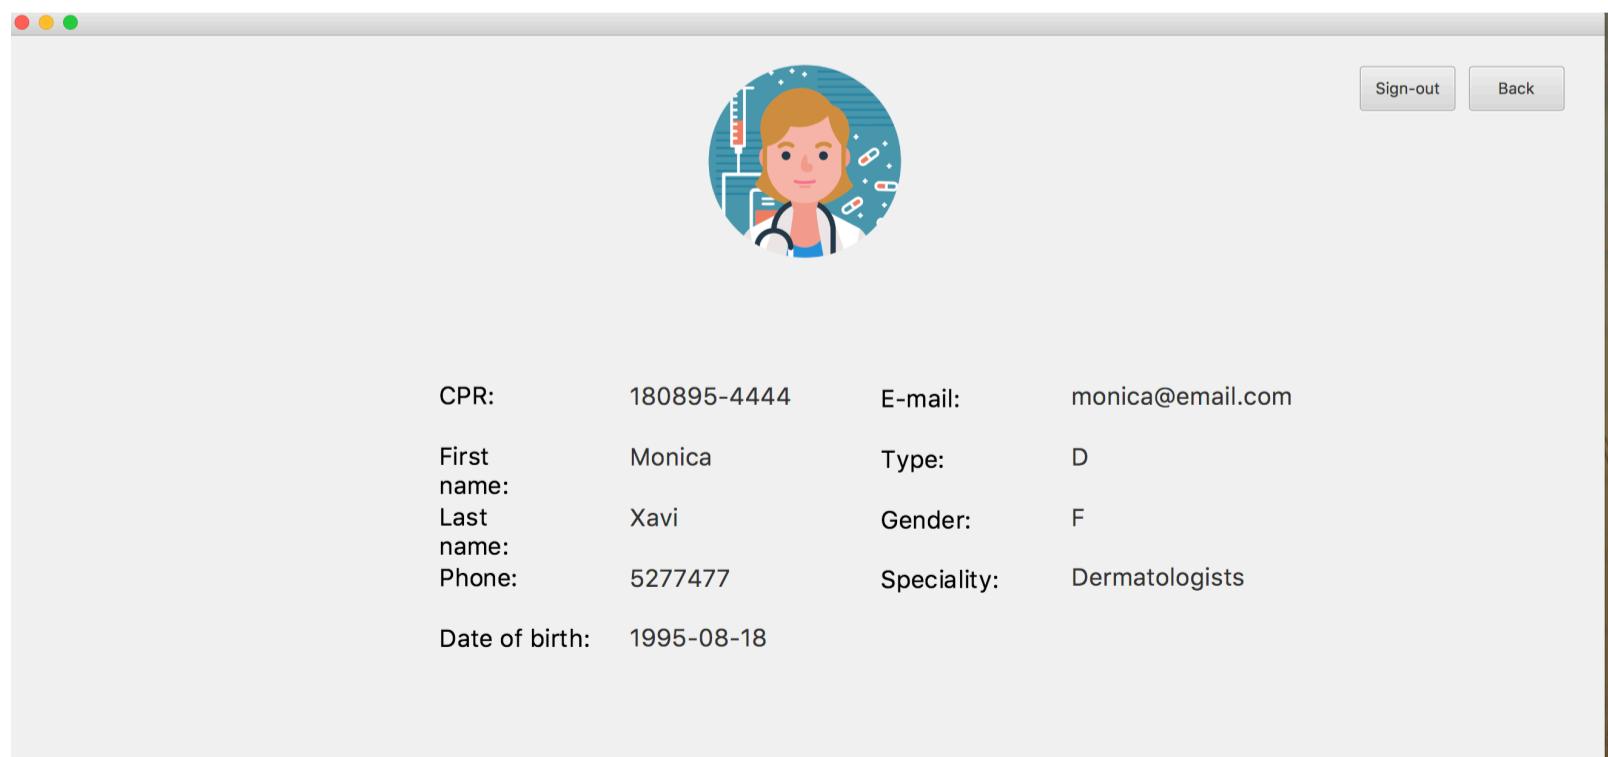

# SPECIALIST

When you enter to the system as specialist doctor you will see your home screen

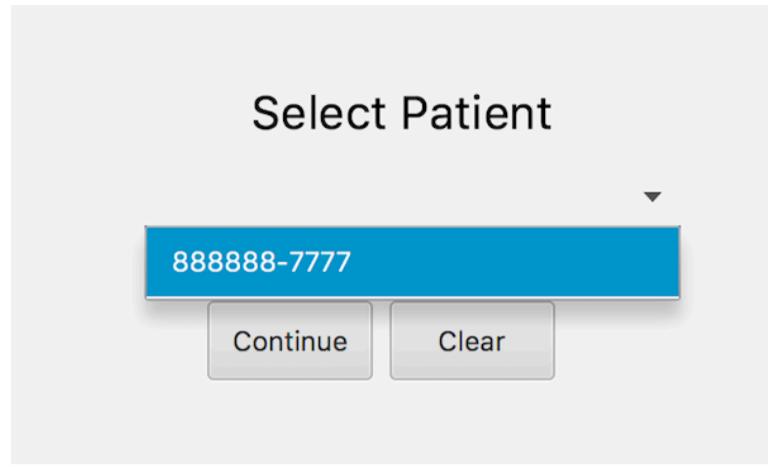

you can see your personal info by pressing

My info

CPR:	180895-4444	E-mail:	monica@email.com
First name:	Monica	Type:	D
Last name:	Xavi	Gender:	F
Phone:	5277477	Speciality:	Dermatologists
Date of birth:	1995-08-18		

If you want work with your patients press [Go to my pacie...](#) and select patient window appear.  
Now you select specific patients by his car number.

**Note! That you cannot see patients if you have not before assigned them to a specific doctor.**

Now you are inside "Current state"window when you are able to make **Prescription ,Recommendations**, write about patients **Problem** and you can make **Upcoming appointment**. After you finish just press
